We provide solutions for Coffee Shops through to Contract Caterers, from Hotels to Restaurants, with tailored and bespoke food display solutions to help you sell more food.

As well as manufacturing food display items from 100% food safe melamine, we also manufacture from materials such as poly wicker, polycarbonate, silicone, acrylic and stainless steel.

At Creative we are passionate about design and innovation in food display and know that 1st class service is paramount in creating a brand you can trust and depend upon.

Who are Creative?
Why use melamine?

“YES, IT REALLY IS MELAMINE”

Yet again, Creative are leading the way in design of melamine products by manufacturing a totally unique collection of premium tableware to help restaurants, coffee shops and caterers minimize the amount of breakages compared to traditional porcelain plates and bowls.

Made from 100% food grade melamine, with properties which are extremely durable, easy to maintain and most importantly completely shatter proof unlike porcelain alternative, Creative’s melamine tableware is truly advantageous to any restaurant.

With advancements in manufacturing techniques, melamine is becoming more prevalent within the restaurant sector for tableware, with the ability to offer diners a more realistic and attractive looking porcelain alternative, rather than just the usual ‘cheap looking white and thin plastic plate’.

Melamine is also a lightweight material that is easier for staff to carry, with the added benefit of being price competitive.

Our innovative range of premium colourful and vibrant melamine tableware enhances any dish, whilst offering a selection of on-trend shapes and sizes of plates and accompanying bowls.

With inspiration taken from sand, sea, stone and Japanese glazing, our collection offers a wide range of designs, allowing you to choose a style of plate or bowl which suits your restaurant, whilst enhancing your customers overall dining experience.
